

# Quantify Impact. *Optimize Returns.*

AI-powered impact analytics and next-gen portfolio solutions that link sustainability metrics to financial outcomes – so investors and corporates can make impact decisions in the language of dollars.

## ABOUT RGS

Richmond Global Sciences empowers investors and corporate leaders to integrate impact into every decision. Our RIFT (Real Impact in Financial Terms) platform translates sustainability into the language of finance. Founded by global experts with 50+ combined years in impact investing.

## THE CHALLENGE WE SOLVE

Traditional ESG ratings rely on inconsistent disclosures, opaque scores, and miss the financial impact of what companies actually sell. We quantify the unpriced externalities beyond ESG ratings, and give investors need decision-ready data rooted in valuation, not opinion.

9,000+

Global Public Companies

350+

# FLAGSHIP PRODUCTS

## IMPACT ANALYTICS

*Impact in dollars, not scores.*

Monetized impact data on 9,000+ companies. Quantifies positive and negative externalities in financial terms, aligned with impact-weighted accounting principles.

- 20+ research-based social cost metrics
- Environmental, employment & customer impact pillars
- Mapped to UN SDGs, EU Taxonomy IMP

**20+**

Impact KPIs

## UN SDGS IMPACT ALIGNMENT

*360-degree assessment in financial terms.*

The first tool to measure SDG contribution through both operational KPIs and the products a company actually sells. Less greenwashing, more truth.

- SDG contribution quantified in USD
- Benchmarking across sectors and geographies
- Helps asset allocators identify greenwashing risks

**9,000+**

Companies Covered

## PRODUCTS & SERVICES REVENUE DATAFEED

*Granular revenue data, decoded.*

Our proprietary PSICS maps 9,000+ companies to 350+ standardized product groups - solving the problem of inconsistent corporate disclosures.

- Live datafeed captured on filing date
- Pre-built themes or full customization
- Each product group linked to SDGs and impacts

**350+**

Product Groups

## AI THEMATIC INVESTING SOLUTIONS

*Portfolios built around what matters.*

AI-powered theme detection identifies companies generating real revenue from the trends shaping tomorrow - climate transition, AI, mobility, and more.

- 150+ pre-built themes or full custom
- AI mapping of filings or PSICS to themes
- Track theme development over last decade

**150+**

Investment Themes

## WHY RGS

### 1 Integrating Impact

The third dimension to risk and return; impact embedded directly into financial valuation.

### 2 Increasing Transparency

Monetized impact replaces opaque ratings with measurable KPIs.

### 3 Communicating Impact

One universal language for decision-makers – currency.

### 4 Quantifying Product Impact

Capturing the value of what companies sell - the missing piece in impact today.

### 5 Assessing Value at Risk

Pinpoint the impact issues that materially affect financial performance.
